PRODUCTION OF NATIVE

Canadian Tobacco

The Province of Quebec produces annually, on a little over 12,000 acres, over 10 million pounds of Tobacco.

In certain parts of the Province, tobacco production has become a science, while in others it has remained what it was 100 years ago.

That is why there is good and bad native tobacco being sold. Some planters, however, and their number is growing rapidly, have found that it pays to produce a good tobacco. They have studied the different phases of tobacco sowing, planting, harvesting, curing and marketing; have formed Co-operative Societies, built modern drying houses for the curing of tobacco and have succeeded in producing a native tobacco equal in texture and aroma to the best imported. It is from tobacco obtained from these planters that

ROSE QUESNEL
Smoking Tobacco
MILD AND NATURAL

is being manufactured and which contributes to make it the most popular Native Canadian Tobacco on the market, a delightful, perfect-burning, smooth and cool tobacco of distinctive fragrance and free from sting and bite.

SIX FORMER MCGILL MEN ARE AWARDED MILITARY CROSS FOR SERVICE OVERSEAS

Capt. S. J. Mathewson, Sci. '15; Lieut. W. H. Morris, Sci. '15; Lieut. F. C. Badgley, Sci. '16; Lieut. R. Lee P. Strathy, Sci. '16; Lieut. R. O. McMurtry, Arts '05, Law '08; and Lieut. Allan Oliver, Arts '15, are Honoured by the Military Authorities—Two are Former Members of the Editorial Staff of McGill Daily—Lieut. Morris Won Commission on the Field with the Princess Pats.

Six former McGill men are among the recipients of Military Crosses, the list of whom was announced last night by the War Office at London. They are Lieut. F. C. Badgley, Sci. '16, Canadian Artillery; Lieut. Allan Oliver, Arts '15, Canadian Artillery; Lieut. W. H. Morris, Sci. '15, Princess Patricia's Canadian Light Infantry; Lieut. R. O. McMurtry, Arts '05, Law '08, Canadian Artillery; Lieut. R. Lee P. Strathy, Sci. '16, and Capt. S. J. Mathewson, Sci. '15, 42nd Canadian Battalion. News of the award of the Military Cross to Capt. Mathewson and to Lieuts. McMurtry and Morris preceded the official announcement.

Lieut. Badgley is a son of C. W. Badgley, of the Emigration Branch of the Department of the Interior, Ottawa. He had completed two years in the University when he enlisted in the outbreak of war with the 2nd Battalion of the First Canadian Artillery Brigade at Ottawa, as a gunner. Previously he had served as a gunner in the 2nd Field Battery of Militia. After some time on the front in the ranks of the First Artillery Brigade, Lieut. Badgley was promoted, and became attached to the Ammunition Column of the Brigade. At college he was known as a member of class athletic teams, and as a member of the editorial staff of McGill Daily. He rowed for the Ottawa eight-oared crew on the Thames in January, 1915, when he was training at Salisbury.

Lieut. Allan Oliver is another former member of the editorial staff of McGill Daily, who has been honoured for distinguished service at the front. After completing his course in Arts, Lieut. Oliver enlisted in one of the batteries of artillery formed in Eastern Ontario, in the summer of 1915, and rapidly went overseas. He was slightly wounded last spring. Lieut. Oliver was an honour student in Economics in his senior years in the Faculty of Arts, and was president of the Economics Club. He was editor-in-chief of McGill Daily for a short time in the fall of 1913, having been previously connected with the newspaper as a sporting writer. Lieut. Oliver played class hockey and football, and like Lieut. Badgley, is a graduate of the Ottawa Collegiate Institute. He is a son of Hon. Frank

LIEUT. PENNOCK DOES NOT MENTION THAT HE HAS WON THE CROSS.

Information from Ottawa is to the effect that a letter has been received from Lieut. William B. Pennock, Sci. '15, serving with the Canadian Engineers, and reported to have been recommended for the Victoria Cross, in which he makes no mention of such an occurrence. He says that he has been through some heavy fighting, and is now on a few days' leave. The report which was published exclusively in McGill Daily on Tuesday on information received from a correspondent in England, is borne out by the fact that a letter has been received in Ottawa from Lieut. Bruce Ross, past student, serving on the front with the Engineers, mentioning the same report.

Oliver, M.P.

Lieut. W. H. Morris is also a product of the Ottawa Collegiate Institute, where he played quarterback on the school football team. At McGill he was president of his class, and played on the defence of the senior hockey team in the City League. He enlisted in the First Universities Company of the P.C.C.I., as a private, rapidly rose to the rank of sergeant, and served with this rank for some months on the front with the "Pats." Last summer he was promoted for good work. A comrade in the "Pats," in a letter home, states that Lieut. Morris deserved the Victoria Cross for his gallantry in the attack of the Pats. on the Somme front on September 15. He is a son of Capt. W. D. Morris, ex-Mayor of Ottawa, and now transport officer of the 235th Forestry Battalion, now stationed at Brockville, Ont.

Lieut. R. O. McMurtry is serving with Major Cape's Battery of Siege Artillery on the Somme front. He has been awarded the Cross for dis-

tinguished conduct as an officer in charge of observation duties. Lieut. McMurtry is serving with a unit which has made a splendid name for itself in the recent fighting in the Somme theatre of operations. Lieut. McMurtry was a member of the McGill Contingent, Canadian Officers' Training Corps, when he took out a commission in the battery to which he has since been attached. He was a member of the legal firm of Brown, Montgomery and McMichael, in the city, and resided at 29 Tower Avenue.

Lieut. Mathewson comes of a military family, several members of which are on active service. Recent advices tell of the continued good work of the 107th Battery, it being stated that it is now so busy that the battery is working in the open and pounding away at the German trenches. Capt. Sam Mathewson has seen considerable service with the 42nd, and in the attack on Courcellette, was slightly wounded by a bullet, which grazed his face. He, however, refused to leave his unit. Capt. J. Arthur Mathewson, who was president of the Students' Council in 1914-15, was wounded during the battle of the Somme on September 15, being hit in the back by shrapnel. A third brother, Lieut. Kenneth Mathewson, Arts '17, of the Royal Flying Corps, has been missing since August 3, when he was shot down in a fight with a Fokker. The American diplomatic service, but without revealing any trace of his whereabouts.

The three Mathewson brothers, at that time officers in the 5th Royal Highlanders of Canada, enlisted in the commissioned ranks of the 42nd Battalion, when that corps was formed by the 5th R.H.C. in the summer of 1915. Lieut. R. Lee P. Strathy was a prominent member of the C. O. T. C. when he enlisted at the close of the spring training camp at Niagara on the Lake in 1915 in a battery of artillery being formed in the Montreal area. He was wounded on September 16. Lieut. Strathy's home is in Montreal, and he is the son of the late Colonel J. Alec Strathy. His mother and sister are engaged in working for wounded soldiers. Lieut. Strathy was twelve months on the front before being wounded. At McGill he was prominent in the skiing club.

OVER \$1,000 IN CASH COLLECTED BY Y.M.C.A.

Proved Most Successful in The Association's History. Recent Financial Campaign

The Treasurer of the McGill Y. M. C. A. announced last night that the total amount in cash taken in by canvassers in the recent whirlwind financial campaign, was \$1,067.95, distributed as follows:

Medicine Students	\$242.50
Arts Students	187.50
Science Students	194.55
Law Students	25.00
Dentistry Students	18.00
R. V. C. Tea-room	55.00
Wesleyan College	14.50
Diocesan College	6.50
Congregational College	11.00
Presbyterian College	20.50
Science Faculty	65.50
Medicine Faculty	95.00
Arts Faculty	36.50
Friends	95.00

When the pledges made by many students are redeemed, it is believed that the actual sum realized in the campaign will be in the neighborhood of \$1,300. The sum already collected is the largest contribution ever made by the University community to the funds of the Y. M. C. A., and will be of great value in furthering the work of the Association in Montreal, in its foreign field, through Murray G. Brooks, and in the maintenance of the Field Branch at Boulogne, France.

In the interclass competition it is believed that Fourth Year Science will rank first, with a subscription well over \$100. Fifth Year Medicine will

likely be second, with Arts '20, third. Although they have been considerably depleted through enlistment, the Senior classes still show the way to their juniors in this and many other respects.

ERIC IRWIN RETURNING.

Lieut. W. E. C. Irwin, Sci. '11, who was badly wounded while fighting with the Princess Patricia's Canadian Light Infantry, and has since been a patient in a military hospital in England, is expected to return to his home in Ottawa shortly before Christmas. Lieut. Irwin was an officer of "A" Company in the McGill C. O. T. C. when he enlisted as an officer in the First Universities Company. He served for some months on the Somme front before being wounded. All the officers of the First Universities Company have been casualties. Lieuts. A. A. Wanklyn and C. A. Pope have been killed, Capt. George Barclay, and Lieuts. W. E. Dutton shell-shocked, and are back in Canada, and Lieuts. W. E. C. Irwin and E. S. McDougall have been wounded.

LIEUT. MOYSE RETURNING.

Word has been received in the city that Lieut. Robert E. Moyse, Arts '11, Law '14, son of Dr. Charles E. Moyse, Dean of the Faculty of Arts, and chairman of the Committee on Morals and Discipline, is about to return from the front on a month's leave. Lieut. Moyse was wounded by shrapnel in the fighting recently at Thiepval, his arm being broken. After receiving treatment in France, he was a patient at the hospital at Fishmonger's Hall in London. He was with the Bedfordshire Regiment, and originally enlisted in the First Universities Company of the Princess Patricia's Canadian Light Infantry. When Lieut. Moyse's leave in Canada expires, he will return to the front and rejoin his unit.

LIST OF THOSE TO REPORT AT TEA ROOM

Work Assigned to Those Who Will Make Preparations for Tea Room.

Those in charge at the tea-room today are:

Committee member in charge — Florence Walker.
To prepare, 2—W. Wyatt, M. Young, K. Baker, W. Blampin, 3—E. Wall, K. Baker, C. Caldwell, G. Ewing.
To make tea, 4—J. Symons, M. Young, J. Balfour, 5—J. Symons, F. Basner, R. Contant.
To make toast, 4—M. Stafford, V. Stafford, F. Basner, E. Borden, A. Cherry, A. Goldstein, G. Ewing, E. Henry, 5—M. Stafford, V. Stafford, E. Wall, D. Dart, W. Blampin, E. Borden, D. Breese, A. Cherry.
To serve, 4—G. Banfill, I. Patterson, D. Breese, J. Brodie, R. Contant, D. Dart, 5—K. Baker, J. Balfour, F. Basner, I. Patterson, L. Fowler, J. Brodie.
Cashier, 4—5, C. Caldwell, 5—6, W. Wyatt.

JOINS THE AIR SERVICE.

News from Vancouver is to the effect that Douglas W. Ross, who spent a year at the University with the class of Medicine '18, has secured a commission in the 235th Seaforth Highlanders, but is about to transfer to the Royal Flying Corps, and will go overseas within a month.

Yale's fall regatta will be held on the Housatonic river this year instead of on the Thames.

SERG. "HOB." GILLMOR, MEDICINE UNDERGRADUATE, WILL BE AWARDED THE MILITARY MEDAL, IS UNOFFICIAL REPORT.

The Military Medal for distinguished conduct at the front, has been awarded to Sergeant Horace May Gillmor ("Hob."), Med. '18, according to private advices received in the city by relatives. No particulars have been received with regard to the particular exploit which has won for this popular McGill undergraduate the Medal. Sergt. Gillmor is with No. 6 Field Ambulance, a unit in which he enlisted in the spring of 1915, and which has been in the thick of the fighting on the Canadian front on the Somme. Sergeant Gillmor is a son of the Hon. Senator Gillmor, 4149 Dorchester street, Westmount, was born at St. George, N.B., on June 29, 1891, and was educated at the Montreal High School before coming to McGill. In 1911 he entered the First Year of the Faculty of Arts and afterwards took three years in the Faculty of Medicine. Sergt. Gillmor was well known as a hockey player at the University, and was a member of the second hockey team in 1913-14. He also was captain of the second football team. He is a brother of Capt. Dan Gillmor, Arts '11, Law '13, now with the 148th Battalion in England.

A CANADIAN-MADE OVERCOAT

of Pure Wool "Irish Frieze"

Designed and tailored by skilled Canadians—for Canadians—on our recommendation:—This—Progress Brand Ulster—shown in convertible collar style—lined throughout with heavy cheek lining, satin yoke and sleeves—is well known, because of its adaptability for the cold winter months—and the wear—well, an Irish Frieze "lasts forever," and the "Progress" label assures the workmanship.

THE CANADIAN CLUB'S REGENERATION.

The excellent reception accorded Sir Herbert Tree when he appeared before the nine hundred odd people gathered in the Union yesterday will certainly give a much needed impetus to activities of this nature around McGill. There have always been a few students who took an active interest in matters literary, but the vast majority did not seem to think it worth their while to bother about them. Whether this was true or not it is impossible to say, but there does not seem to be any reason whatever for the existence of such a spirit hereafter. The friends of the University, and the students as well, turned out in praiseworthy numbers to hear the great actor-knight, and from the remarks which have been made since, were amply repaid for the time spent there. It goes to show that The Canadian Club is not a dead institution here at McGill, and that it only needs a little work on the part of the executive in the way of getting prominent men here to make this season one of the most successful in the history of the club. It should not be a very difficult thing to do this in view of the fact that politics are "looking up," with the result that many men prominent in Canadian affairs will be in the city delivering speeches to the various clubs. Most, if not all, of such men would be only too glad to come and speak before the student body. It means for the speakers that they will be getting in close touch with the men who will be stepping into public life when they leave college. It will mean for the students that they will be given an opportunity of forming opinions of the men who are influencing public thought in the country one way or the other. McGill Daily hopes that the commendable meeting of yesterday will be but a forerunner of many more of a similar high standard.

THE PROPOSED BATTERY.

The rumor of another McGill Battery which gained a certain amount of credence among the students of the University a short while ago, has not been allowed to drop. The interview with Sir Stopford Brunton, which appears in another column of the Daily, shows that those with whom the organization of such a Unit rests have not been idle, and are doing all in their power to make it a reality. Every man who can enlist will do so in some unit or other, and the advantage of having all, or a great portion of the men from one college, men who have been living in the same University community, together, in the fighting zone is a great advantage, and one of which the men will be only too glad to take advantage. The Battery affords an opportunity for men who have been following a course of training in a University of putting that training to the test of actual practice, and to place the technical knowledge which they have acquired at the service of their country. As Sir Stopford said, it is infinitely harder for those in charge of training a Battery to turn out an efficient Unit if the material from which they have to pick is taken from the ordinary man in the street. The work of the Artillery lends itself particularly to the University-trained man, and more than that, to the man who takes any of the courses taught in college. This does not seem to be generally known, as many say, "Oh, that is only for the Science fellows." This is a wrong impression, and one which should be corrected at once. According to the proposed scheme, an artillery course will be given in connection with the C. O. T. C., and we are assured that it will not entail any extra work, from that required at present, by those who would take the course. In other words, the present hours of drill would be quite sufficient to include both Artillery work and the drill required by the University authorities.

THE TEA ROOM.

While the proceeds from the Tea Room have been very satisfactory, yet there is one feature in regard to the patronage which might be improved. We refer to the fact that it has been practically the same people week after week who contribute to its support. This is not the right idea. The Tea Room has been in existence long enough for every student in the University to become acquainted with the fact that it is an excellent place to secure a "bite" before or after lectures. The following statement from the committee in charge will be of interest in this connection:

"Many of the students of McGill University have not yet found their way to the tea room, and for these we print directions. The tea room is managed entirely by the R. V. C. girls, who are working hard two days a week—Monday and Friday, to be exact—to raise funds for Patriotic purposes, and it is in Stratheona Hall. Are you fellows willing to stand back and let a faithful few do the patronizing, and not come forward to give some support yourselves to this college organization?

This afternoon you will be given an opportunity of showing your interest and lending your support.

GIFT TO CHICAGO UNIV.

John D. Rockefeller announces that he has donated two million dollars for a new medical department at Chicago University, that will surpass any similar institution in the country. In addition to this sum, the university itself will raise five million dollars, and will give the site, valued at half a million, for the school.

Four hundred carefully selected students will make up the first class, which, it is expected, will begin work in the fall of 1918. The faculty will be composed of the foremost medical authorities in the country.

The women of the University of Oregon are planning some innovations in the matter of Big Game football demonstrations. At a meeting held last week it was decided that the women would get out on the field after the Washington-Oregon game next Saturday and serpentine at the same time as the men. An announcement by the committee in charge of the plans said that the marching stunt would be arranged so that it would be at once effective and dignified.

RESEARCH WORK IN ENGLAND.

Manchester, England. — An important new departure in connection with the dyestuff industry is announced by the faculty of technology in the University of Manchester. Prof. A. G. Green, F.R.S., who as stated in The Christian Science Monitor at the time, recently resigned his post at the University of Leeds, has been invited to take charge of a new department for advanced study and research in the School of Technology. The new department will be open only to post-graduate students, or to those of equivalent attainments. Professor Green will be assisted by Mr. F. M. Rowe, M.Sc., and Dr. G. Grant Hepburn. The staff will also have the help and advice of Dr. Edmund Knecht, who is well known as an expert in dyeing chemistry.

The combined Y. W. Y. M. C. A. of the University of Texas last week held a picnic in the woods near the campus, which picnic was so plentifully attended that the record-breaking sum of two thousand hot tamales was consumed.

PHYRNE AND FRANKENSTEIN.

My Dear Phyrne,—I am afraid that you are a very illigal person. You ought to have been able to see from my letters that I, Frankenstein, was heart and soul with the women in their struggle for liberty. I believe Dr. Holmes was right when he said: "We have even now a new revelation, and the name of its Messiah is 'WOMAN!'" Good old Holmes!—he knew a thing or two!

I am not quite satisfied with the Socialists, whose views you seem to have adopted. The average member of the party is too prone to call others prejudiced, to scoff at religion, to confuse economics with ethics and politics. I am ready to admit that it is not fair for some people to ride in automobiles, while others haven't enough to eat; but why must I accept the "materialistic conception of history" and all that sort of thing? "More than twelve million people believe in it," said a classmate of mine the other day. But that doesn't make it true. If all the ignorant people were to assemble, and to shout with one voice,—"We believe in the story of Adam and Eve!"—such a declaration would by no means invalidate the teachings of Biology and Geology.

Then again, look at what took place in Europe not so long ago. Had the Socialists been truly religious men—had each man said to himself, "I must do what is right, no matter what my neighbours say,"—this great European War never would have begun. But they, being a more or less irreligious crowd, thought their highest duty was loyalty to their party. And so, when the time for action came, they were like a lot of helpless children. Dr. Holmes tells a story of how the people of the earth once resolved to shout "Boo!" on a certain day, so that they might be heard in the moon. When the day arrived the world was silent as the grave; everybody was waiting to hear the noise. This was exactly the way the Socialists behaved; everyone waited for someone to act.

Think of what this organization, probably the largest in the world's history, might have done, if it had been spiritualistic instead of materialistic! Think of what the primitive Christians, who were only a handful of men, accomplished! Socialism may take the place of a religion in SOME minds, but it is a mighty poor substitute as far as the masses are concerned.

In our day, when pleasure is the only god and money the only god, people say that religion is a relic of barbarism. Yet people will and must have a religion. And if women acquire all the rights of men, a civilized wave will pass over the religious world; for women, as you know, are far more religious than men. Religion, therefore, is NOT an antiquated thing, and never will be.

This is a very heavy letter—probably because it was written during the Latin lecture. Au revoir.

FRANKENSTEIN.

COLLEGE MAN DECORATED.

Major J. K. Mackay, of Nova Scotia, awarded the Distinguished Service Order, is a graduate of St. Francis Xavier College, Antigonish, N.S., and was a student in law at Dalhousie University when he enlisted. He now commands the Sixth Howitzer Battery at the front.

TO SPEAK IN TORONTO.

Dr. A. W. Thornton, of the Department of Dentistry, will give an address in the Normal School, Toronto, on Monday evening, on "Ireland and the War." Illustrated. He leaves for Toronto Friday evening.

WOMEN'S UNION CONCERT.

The McGill Women's Union are arranging to give a concert in aid of their work, on December 12, at the Ritz-Carlton. The concert will be under the patronage of Sir William Peterson, and the Governors of McGill, and the artists taking part include Miss Helen Ballon, and Norman Notley.

SECURES A COMMISSION.

Herbert M. Frost, Art. '14, has secured a commission in the Western Irish Battalion, and is now training in British Columbia, preparatory to going overseas. His home is in Vancouver, B.C.

ARTS AND R. V. C. MIXER.

This evening at 8 o'clock, the class of Arts '17 will entertain R. V. C. '17 at Military Five Hundred in the Grill Room of the Union. Cards, music and refreshments will constitute the evening's programme.

STUDENTS SUSPENDED.

Three students of the Second Year of the Faculty of Arts have been suspended owing to the non-payment of fees for the session, according to an announcement posted yesterday in the Arts Building.

HANG RULES IN UNION.

The revised house rules of the Students' Union have been framed and hung in the building for reference by members. In addition a large group photograph of No. 271 (Canadian) Siege Battery, formerly No. 6 (McGill) Siege Battery, has been placed in the lounge room of the Union.

MANDOLIN CLUB MEETING.

Last those who pluck sweet melodies from metallic strings should allow it to escape their memory over the week-end, let them be advised that the first practice of the Mandolin Club will take place on Monday evening, at 7.15, at Peate's Studio. For the benefit of those who are not acquainted with the exact location of this Hall of Harmony, it is one floor up, next door to the Willis Building, on the southern corner of Drummond and St. Catherine Streets.

ANNUAL BUSINESS BOARD.

There will be a meeting of the Business Board of the Annual to-night at 7.30 o'clock, in the R. V. C. As important matters have to be dealt with, it is urgently requested that all members of this Board be present.

Under the joint auspices of the Y. W. C. A. and the students' co-operative store of that institution, the women of the University of Oregon are preparing to play a briik trade in peanuts, popcorn and soda water at their big game with Washington next Saturday. Some of the women will be assigned to the supply wagons to dole out the refreshments, and others will be told off to dispense the goodies to the audience.

The Royal Naval Canadian Volunteer Reserve, wants men for immediate service Overseas, in the Imperial Royal Navy

Candidates must be sons of natural born British subjects and be from 18 to 38 years of age.

PAY \$1.10 per day and upwards. Free Kit. Separation allowance, \$20.00 monthly.

Apply to the nearest Naval Recruiting Station or to the Department of the Naval Service, OTTAWA.

ORIGINAL GENUINE

Horlicks Malted Milk

Instantaneous Lunch Invigorating.

The Food-Drink for All Ages—Highly Nutritious and Convenient

Rich milk, with malted grain extract, in powder form—dissolves in water—more healthful than tea or coffee. Used in training athletes. The best diet for Infants, Growing Children, Invalids, and the Aged. It agrees with the weakest digestion.

Ask for "HORLICKS"—All Chemists, Hotels, Cafés and Stores.

Don't travel without it. Also keep it at home. A lunch in a minute. In Lunch Tablet form, also, ready to eat. Convenient—nutritious.

The Royal Military College of Canada

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instruction in all branches of military science to Cadets and Officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years in three terms of 34 months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about \$800.

The annual competitive examination for admission to the college, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont. or to the Commandant, Royal Military College, Kingston, Ont.

CAPT. SIR STOPFORD BRUNTON'S PLANS FOR PROPOSED MCGILL SIEGE BATTERY

In Interview, Tells of How He Will Set About Organization of Overseas Battery of Artillery, Provided Sanction of Military Committee is Obtained—Work Would be Taken in Artillery Course in Conjunction with the C. O. T. C.—Trips to Munitions Plants and Lectures on the Subject to Form Part of the Curriculum of the Course.

In an interview given to McGill Daily last night, Capt. Sir Stopford Brunton gave a very clear outline of the proposed manner of formation of the McGill Overseas Battery. The matter was to have come before the Military Committee, but owing to the absence of Sir William Peterson, the meeting has been postponed, and no definite information can be given as yet. By next week, at the latest, information of a definite character can be given. Capt. Simpson hopes to have the meeting held Monday, as the sooner a decision can be reached and work started, the better it will be for the time is limited.

Capt. Brunton has been untiring in his efforts to raise a battery, and has the manner of procedure very clearly outlined. This battery is to be formed from McGill students mostly. It would be impossible to form the whole battery of only McGill students, as it is doubtful if enough men could be raised from among the student body. The total number required for a battery is roughly 180 men. Of this number there must be at least 30 officers. This last includes experienced and practically trained men, such as wheelwrights, etc. None of these men are to be found among the students, and therefore must be drawn from the outside. There remains now roughly 152 men who must be highly trained. The student body at McGill this year is very small, compared with other years, and from this number must be eliminated those who are aliens and do not care to enlist, also the men who are medically unfit. Of the remaining men it is certain that all would not qualify for the battery; so it is easily seen that it is doubtful if the total number required could be all McGill students. The plan proposed, to supply the rest of the complement, is to take friends of the students. There are many men about the city who would enlist in a McGill Battery, but would not enlist in other companies, for facing the matter straight in the face, there are batteries and batteries, and battalions and battalions. This, then, would be practically a complete McGill Battery, and at least the nucleus which, is the most important part of all, would be McGill men entirely.

The value of such a battery as this would be easily seen. The need of batteries at the front is very great, but there is a lack of batteries, but the more artillery there is the more the infantry is saved. If our artillery can fire 11 or 15 shells for 10 of the Germans, then a bombardment would stop, and when the time for advance came, we could more effectively prepare the way. This last phase of the work is the one in which our battery would excel. The majority of the gunners would be college-trained men, men that have been trained to think; whose brains are most susceptible to impression. These are the kind of men that make excellent gunners. The man from the street could not make such a gunner, and it is no fault of his. His mind was never trained as a college man. The students, then, said Capt. Brunton, certainly should turn out and form a crack battery.

As to the method of procedure in the formation of the battery, Capt. Brunton said that the regular C. O. T. C. drills would be as usual, only some of the hours would be changed. The men would be drilled as at present, part of the time, and then given the special artillery training. The hours would be no longer than at present, except that they would be changed slightly. The real artillery work could not commence until after the men had become thoroughly efficient in squad drill. This is the fundamental part of all the training. Doubtless, squad drill is unpleasant, and a hard, wearisome task, but until a group of fellows learn to act as a unit, they are useless in artillery work. Now, of the C. O. T. C. only the best men could be taken for the battery. This, of course, would mean the co-operation of every officer, as it would be no easy task to decide upon the most efficient men. As the remaining men became more efficient they would be drafted in order until the full complement had been reached. When the battery is formed, they would drill with the C. O. T. C., as a unit, and any attendance at artillery drill would be counted as an attendance at the C. O. T. C. Lectures on munitions and things connected with artillery practice would be held from time to time, but all within the present length of time. Trips would be made to the munition factories also, to get an insight into the manufacture of the projectiles, and arouse interest in the subject. Nothing in all this would be done towards going overseas until the close of the University in the spring. Most men who have come to the college for the first time come with the intention of finishing the year, and by the arrangements no man would leave without finishing, and seniors could take their degrees. Thus the battery would in no manner change the present conditions, and still at the end of the session a crack artillery unit would be ready to be turned out. It might be said that the parent of this battery would always be the C. O. T. C., and even though it was called by a different name at the front, would not alter its standing. Although Major Tait's battery is called the 27th, it is still the McGill Battery, and considered as a unit.

SIR HERBERT TREE ADDRESSES ABOUT NINE HUNDRED PEOPLE AT THE UNION

Delivers Lecture on Humour in Tragedy, Punctuated by Many Anecdotes of an Entertaining Nature—Splendid Turnout of Students, Members of the Teaching Staff and Friends of the University at First Open Meeting of the Reorganized Canadian Club—Prominent Students and Members of the Professoriate are Introduced to Famous Actor-Knight Before the Meeting.

Some nine hundred people greeted Sir Herbert Tree yesterday afternoon when he spoke in the Union before the Canadian Club of McGill. All the chairs were occupied and even standing room was hard to secure. In introducing the speaker, D. C. Hyde, president of the Literary and Debating Society, expressed his pleasure at the large attendance and feeling that it was unnecessary to deal with either the personality or ability of the eminent actor, allowed Sir Herbert to take the platform.

It is almost impossible to do justice to the remarkable speech which was delivered on account of the fact that every word was worth while listening to and repeating for those who did not have the opportunity of hearing the able talk on "Humour in Tragedy." Those who thought that it was going to be a "heavy" subject were pleasantly disappointed, for humour was much more to the fore than was tragedy.

Pointing out the difference between, or rather contrasting wit and humour, the speaker declared that the humour man is the happy man; the really happy man because humour is lasting and not a mere transitory state as is wit; wit comes in flashes, humour in a steady beam. The wit is unhappy because no one wishes to take him seriously. If all the world had a true sense of humour there would never be any war, and it would be taking it all around, a much better place. The remarkable good feeling which existed between the opposing troops in the trenches the first Christmas of the present war, the speaker attributed to the sense of humour which the soldiers possessed, and he went on to say that if that state had been allowed to go on the war would have soon ceased. In London even to-day, when things are supposed to look at least sedate, one is impressed by the remarkable good feeling and happiness which exists. The theatres are all open and playing to crowded houses, the variety and comedy ones being the best patronized. This is the keynote to the victories of the British, and it is the keynote to the disasters of the Germans. Lack of a sense of humour in the Kaiser was the cause of this war, said Sir Herbert, and after the conflict was over the Kaiser erected on a high pedestal of hate as a solemn warning to future generations.

Coming back from talk of the war the humour of Shakespeare was dealt with, and a remarkable comparison of the difference between Shakespeare the creator and Napoleon the destroyer, was drawn; going farther the points of resemblance of the Kaiser to Napoleon was forcefully brought out, and the truth of the statement that lack of humour is the cause of war was driven home. A recitation of the battle scene from Hamlet, and one of Falstaff's speeches were given, both of which were much appreciated.

The idea of this was to show that the personality of Shakespeare predominated all his plays, and that it is an easy matter to recognize both of these passages as children of the same brain. He related an anecdote which illustrated this to perfection. It seems that he was asked to allow a phonograph record of these two passages, and it very nearly happened that he spoke the passage from Hamlet to the voice of Falstaff, and vice versa.

Switching back again to the war, Sir Herbert declared this to be a holy war; a war which, if won by Germany, would mean the world under the rule of tyranny. The greatest tragedy of the war would have been the non-participation of the British in the struggle. After this war there will be another war; a war which will be one of peace. In bringing his talk to a close he spoke highly of Britain's humane and sane treatment of races and peoples which she had conquered; citing in support of this the fact that all the colonies rallied to the assistance of the mother country when she needed them.

Sir Herbert's speech was punctuated by numerous witty, or in view of the speaker's definition of this word, one should say "humorous" remarks and side remarks, which were certainly appreciated by those present, and which added, if it were possible, much to the enjoyment of the meeting.

Before the meeting commenced a number of students who were prominent in college activities, had the opportunity of meeting the student.

QUEEN'S OFFICERS NAMED.

These officers have been appointed to the 253rd (Queen's University Highland) Battalion, which is commanded by Lieut.-Col. P. G. Campbell, of the University Professorial Staff; Major R. D. Sutherland, 14th Regiment, Kingston; Quartermaster, Captain W. P. Grant, 237th Battalion, C. E. F., Adjutant, Capt. A. H. Tett, 14th Regiment, Kingston; Major, R. M. Vanluven, 4th Hussars; Captains, T. Kirkconnell, Queen's C. O. T. C., and J. D. Deserter, 14th Regiment; Lieuts., G. B. Emery, G. A. R. Emery, E. W. Skinner, all of the 14th Regiment; W. A. Monck, 47th Frontenac; G. J. MacMillan, 59th Cornwall; Paymaster, Capt. H. A. Small, Queen's Engineers.

COLLEGE TRAINING FOR POLICE-MEN.

Washington Times—Establishment of a course for policemen at Harvard has led to the recommendation that the Washington schools provide such a course for Washington bluecoats in the evening schools. The idea is worth considering. The work of policemen is rapidly becoming specialized, and such tasks as that of a crossing policeman require special training and practice. Cities are placing a higher value upon the personnel of their police forces, and they expect much more from the policemen than detection of crime. Newton D. Baker, when Mayor of Cleveland, did much to bring about a realization of this broader activity of the police force, and Police Commissioner Woods in New York has developed the idea of training policemen for their broader and more complicated duties. The way to getting more effective police work is to provide systematic teaching.

NEW GEOLOGY BUILDING.

Cedar Rapids, Ia.—Iowa University is to have a geology and botany building, to cost \$100,000 or more. Dr. George F. Kay, professor of geology, and Iowa State geologist, and Prof. Bohumil Shmek, head of the department of botany, are on a tour of Kansas and Nebraska, and eastern cities, to study kindred buildings, to secure up-to-date information as to methods, equipment, architecture, etc., preparatory to submitting plans to the architects, State Board of Education, and the Iowa Legislature.

Lewiston, Me.—The Bates College Athletic Council has awarded the B's won by members of the football squad during the season which ended with the Colby game recently. Letters were awarded to Captain Dewever, Davis, Murray, Stonier, Shattuck, Adam, Moulton, Kennedy, Connors, Knight, Wiggin '20 Clifford Hickey, Talbot and Cutler.

UNION ATTENDANCE INCREASING

A slight advance was recorded yesterday in the attendance at the Students' Union dining room, with approximately 220 meals served, about five more than the total of the previous day. The noon day meal was again the largest, with 122 patrons, while the evening meal was eaten by approximately 70 students. As has been the case ever since the dining room was opened this year, breakfast was again poorly attended. Only 25 were in attendance. It is perhaps not known to students generally that they are not required to order the regular breakfast, but may obtain a meal of rolls and coffee a la carte or any other portion of the menu a la carte. Breakfast hours are eight to nine-thirty. MAKE IT THREE HUNDRED TO-DAY!

GERMAN DYES COMING.

Washington, D.C., Customs Department announces that with special permission from Great Britain, a shipment of dyes reported to be worth \$1,099,000 is now en route to New York from Germany for use by this Government in printing paper money. The dyes were shipped through Holland and are on board liner Nieuw Amsterdam.

WILLIAMS DROPS CANE RUSH.
By a unanimous vote the students at Williams have voted to discontinue the annual cane rush between the freshmen and sophomores. Some milder form of a contest will probably be adopted in its stead.

CEDAR RAPIDS MYSTERY.

(Written Specially for McGill Daily.)
At Cedar Rapids there is a big hydro-electric power plant which develops 100,000 horse power. 80,000 of this, at 110,000 volts, and 60 cycles goes to Massena, N.Y., and 20,000 at 66,000 volts and 63 cycles comes in to Montreal.

When my chum and I landed in Cedar Rapids we were having some severe line troubles. The trouble took the form of flash-overs at the insulators, and arcing at the horn gaps, and the disturbances were so strong that the entire staff of experts were giving their undivided attention to the problem.

The principle features that drew attention were, that the disturbances were only on the Massena line only, and they always occurred between midnight and 4 a.m. Obviously this was the work of some German spy. The Home Guard were called out to patrol the grounds, and the Motor Boat Patrol to look after the Canal. But all to no avail.

After a while it occurred to one of the staff that the spy must be in New York State, and he couldn't get across the line; that would account for the Montreal line being free from any disturbance. This, however, was of minor importance, for since the line was carrying 110,000 volts continuously, no one but His Satanic Majesty himself could make a direct connection and get away with it. This possibility was immediately ruled out for the party in question is definitely known to be in Europe at the present time directing the forces opposing the Allies.

The only possibility left was that some form of wireless waves were being employed. Working on this hypothesis an expert with a new and improved form of oscillograph was obtained from Government Headquarters. Oscillograms of the surges were taken for several nights in succession, and the results blue printed.

The surges on Massena consisted of three heavy rushes of current in quick succession at the fundamental frequency, followed in about five seconds by slight disturbances in the higher harmonics. This combined disturbance was repeated at five minute intervals, and varied considerably in intensity, though always of the same general form. Moreover, the oscillograph showed there were high frequency disturbances on Montreal at the same time; the effect was most marked on Massena. These, however, were not noticeable in general operation.

These 'grams were carefully studied, and all possible data was compiled. But the problem baffled the keenest minds. Everyone's nerves were keyed to the breaking point—haggard expressions were the order of the day, and even the genial and effervescent superintendent was showing a marked change in his usual sunny disposition. Something had to happen or the men's nerves would break down.

It happened on the fifth day after the expert came. He had given up taking 'grams, for they were all the same, and on the fifth night he took his oscillograph to the clubhouse and set it on a table in a spare room. Imagine his surprise and consternation the following morning, when he found that the mechanism had been left running and a complete set of 'grams were recorded on the automatic recorder. This was a most baffling situation for here the instrument was completely isolated from the circuit, and still it had recorded perfectly all the line surges. In fact, they were more pronounced than when the instrument was connected to the system.

Everyone was at a complete loss, and no explanation whatever was put forward. That night the instrument was again set up in the room, and an armed guard was provided.

Shortly after midnight the watchers heard a low humming sound. The surges had commenced operations. As the sounds increased in intensity it sounded like a knotty spruce board going through a planer, followed by a shrill hum as the planer speeded up after the cut.

This sound continued periodically for upwards of an hour. Everyone was scared to move—faces were pale and drawn into rigid lines and eyes were bulging out like golf balls.

At last the silence was broken by a harsh grating laugh—someone's nerves had failed. But, no, the amusement was so genuine, a nervous wreck would hardly double up across the foot of a bed and laugh like that. The peculiar noise ceased—there was a creak as of a bedspring in distress, and a booming bass voice inquired in rather peevish tones, "What the—!"

And then we fell for it! There was a big Pennsylvania Dutchman bossing a construction gang on the day shift, and bunking in the club house nights. About midnight he would begin to snore, and as the snore increased in intensity and frequency, they would come up to synchroism, and tie in with Massena at 60 cycles. This accounted for the time, midnight to 4 a.m., and also for the surges being on Massena only, for when the surges tied in at 60 cycles, they could not pull the system up to the Montreal frequency of 63 cycles. The end of the snore would be a shrill whistle, corresponding to high-frequency harmonics, and by induction affecting both lines.

As each snore was emitted the insulators would flash-over or puncture; the horn gaps would arc, lines of static electricity would play over the switchboard, and instruments and the transmission towers would rock as though there was a young earthquake.

TO-DAY'S MENU AT THE UNION.

Can't Be Beaten!

Soups—Clam Chowder; Beef Broth with Rice.
Fish—Boiled Salmon Hollandaise;
Fried Halibut Steak with Tomato Sauce; Codfish Cakes with Cream Sauce.

Entree—Grilled Lamb Chops with Green Peas; Baked Pork Sausages with Fried Onions; Broiled Small Steak au Jus; Tenderloin Croquettes with Parsley Sauce; Game Pie Individual; Cold Roast Beef with Potato Salad.

Eggs to Order—Plain Omelet; Cheese Omelet; Scrambled or Fried Eggs.

Roasts—Prime Ribs of Beef au Jus; Leg of Lamb with Mint Sauce; Leg of Veal with Dressing.

Vegetables—Boiled or Creamed Potatoes; Mashed Turnips.

Desserts—Pumpkin Pie; Strawberry Jelly with Cream.

WHAT'S ON

TO-DAY.

8.00 a.m.—Breakfast at McGill Union.
12.00 p.m.—Dinner at McGill Union.
4.00 p.m.—R. V. C. Tea-room, Strathcona Hall.
5.30 p.m.—Supper at McGill Union.
7.15 p.m.—Business Board of Annual, Royal Victoria College.
8.00 p.m.—Arts '17—R.V.C. '17 Mixer, McGill Union.

COMING.

Nov. 20—First practice, Mandolin Club, Peate Studio of Music.
Nov. 22—Arts Undergrad, Smoker, McGill Union.

DO YOU CATCH COLD?

Dr. H. B. Ward, head of the department of zoology at Illinois, recently gave the students beginning in zoology directions for avoiding colds. Last winter there was an epidemic of colds in nearly all the large universities of the country, and the efficiency of the institutions was greatly impaired. Several of the schools were closed for a week prior to the Christmas vacation, as so many students were ill it was impracticable to hold the classes.

"Colds are not gotten from any phase of low temperature," Dr. Ward said. "They are due to an infection of the air passages. The bacteria which causes this infection is omnipresent, and cannot be avoided, but conditions can be made such that the bacteria will be resisted. A good measure for preparedness against colds is deep breathing, and plenty of cool fresh air in study and class rooms."

"The more you coddle yourself, the more sure you are to fall a victim to what you are attempting to guard against. In general, drafts do not give colds, and are better for one than still air. Under proper conditions cold air can hurt no one," he continued.

WAR CONSTRUCTION WORK.

The energy and patience with which the French authorities, supported by the French people, have from the first set themselves to prevent the war interfering, any more than is quite unavoidable, with the normal development of the country, is one of the remarkable features of the struggle as it affects France. Such questions as labor, agriculture, education, art and literature, are all being accorded due attention, and, in most instances, greater attention than at any time before the war. Like the Dutch farmer who sees an opportunity to reclaim land and straightway reclaims it, the French statesman, the moment the tide of war recedes from French territory, or relief to effort is afforded in any direction, straightway makes full use of his opportunity.

The latest instance of such alertness is to be found in the appointment of a committee to deal with the work of reconstruction in the devastated provinces. On this committee will be represented all those administrative departments that are interested in the reconstruction work, and a study of M. Briand's statement on the matter shows that the basis of the scheme is of a most enlightened character. The great difficulty in all such enterprises, carried out as they must be on a large scale, is, of course, to secure that individually of effort which shall make the work one of real restoration. The effort of the state is to be to encourage and support, and, in some cases, to initiate individual schemes, although it is, of course, recognized that in many instances the government will have to take the whole matter in hand.

A beginning has already been made in certain territories that have suffered from invasion. The government has taken measures to meet the more urgent demands, but the need is felt for co-ordination of effort; hence M. Briand's committee. In many cases villages and towns will have to be practically rebuilt from the foundations. It has not yet been decided, apparently, what character this rebuilding should assume, whether an effort should be made to reproduce the old buildings, as far as this may be possible, or whether some entirely new form of rehabilitation should be adopted. In this connection, it is welcome to note, especially where the latter course is decided upon, that the government is to exercise a general supervision. If, however, an undue uniformity is to be avoided, the freest possible scope should, of course, be given to individual taste, subject always to its conformity with the general purpose.

GOES TO THE FRONT.

A London despatch says that Lieut. E. M. Cockshutt, Sel. '19, who left the University last spring to enlist in a unit organized in Western Ontario, has crossed the Channel to join the Canadians on the front after a period of training in England.

NATIONAL DRUG & CHEMICAL CO. OF CANADA LIMITED

PROVINCE OF QUEBEC

DEPARTMENT OF COLONIZATION, MINES AND FISHERIES.

The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES.

First of all, obtain a miner's certificate, from the Department in Quebec or from the nearest agent. The price of this certificate is \$10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of the certificate may stake mining claims to the extent of 200 acres.

WORKING CONDITIONS.

During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING.

At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE.

The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year, and a fee of \$10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.

Notwithstanding the above, a mining concession may be acquired at any time at the rate of \$5.00 an acre for SUPERIOR METALS, and \$3.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land, where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.

Special arrangements have been made with the Laval Technic School of Laval University, 228 ST. DENIS STREET, MONTREAL, for the analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to

HONORE MERCIER,

Minister of Colonization, Mines and Fisheries, Quebec.

S. Hyman Limited TOBACCONISTS
will be glad to welcome the Students at their three stores
561 ST. CATHERINE WEST

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF \$500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA.
OCTOBER 7th, 1916.
